KANGOUROU AWARD CEREMONIES 2014

PREFACE

The International Kangourou Competition is an educational project aiming to promote the learning and use of European Languages, the learning of Mathematics and the strengthening of cultural links between the countries, through a popular competition for all.

The competition is organized Internationally by the international association Kangourou Sans Frontieres (KFS), to which Thales Foundation is a member. The Kangourou International Competition in Mathematics is the most popular mathematics contest in the world reaching over 6 million participants from 55 countries in 2014. The Kangourou Linguistic was established in 2004 in order to promote the learning of the four European Languages, English, French, German, and Spanish. With the approval of the Association Cyprus is piloting a Kangourou language competition for the Greek language.

The competition content promotes the harmonious development of youth using non-formal education, by stimulating the creative and applicative thinking, the intuition, the imagination, the ability to select and to make decisions under pressure of time. In addition, it familiarizes both pupils and teachers with modern methods of testing and verification, in Europe and in the world.

New activities of the THALES Foundation include the publication of new books, the organization of EUROMATH 2014 Conference in Nicosia, Cyprus, the organization of the Math Factor Europe 2014 and MATHeatre Europe 2014 and an active participation in the Le-MATH Project.

We would like to thank the Ministry of Education and Culture for their cooperation and support in informing the pupils and the French Embassy, for their support in the Linguistics Competitions. Thanks also to the schools Forum and Heritage for supporting the Foundation and hosting the award ceremonies.

Congratulations to the pupils who participated, including those receiving a medal and those who did not!

Dr Gregory Makrides
Coordinator of Kangourou Competitions for Cyprus
