25. Cyprus is a member The European Union.

- A) from B) of C) in D) - E) -

Read the text. For each question 26-30, choose the correct answer.

Seeing a Black Hole for the First Time

People thought it was impossible, but a team of two hundred international astronomers captured an image of a black hole in 2019. Evidence of the existence of black holes has been around for some time. An ambitious team of astronomers and computer scientists managed to do it. Working for well over a decade, the team took a photo of the hole, surrounded by a “ring of fire”. Katie Bouman, a 29-year-old computer scientist, helped develop the algorithm that created the first-ever image of a black hole. She started making the algorithm three years ago. Dr Bouman insisted the team really helped her. “No one of us could’ve done it alone,” she said in an interview. The black hole, which no one can see without special technology, measures 40 billion km across, or three million times the size of the Earth. It is larger than the size of our Solar System.

26. People thought making a photo of a black hole was

- A) risky B) tricky C) only a dream D) - E) -

27. The team of scientists worked for

- A) a bit over ten years B) a bit less than ten years C) more than ten years D) - E) -

28. The photo shows the hole surrounded by

- A) a necklace of fire B) a circle of fire C) an explosion D) - E) -

29. Katie Bouman was very about her achievement.

- A) arrogant B) modest C) sensitive D) - E) -

30. Black holes can be seen by

- A) simply looking at the sky B) using special glasses C) using fancy technology D) - E) -
