THALES PROGRAMME

PROMOTING COMPETENCES AND SKILLS

2023-2024

➤ **For students between 8-15 years old**

Objective: to develop students' math skills, reasoning ability and critical thinking.

- Four age levels: 8-9, 10-11, 12-13, 14-15
- Training may be in Greek or English or Combination

Features of the Training Programme

The programme focuses on four thematic factors and four ability levels.

1. Word Problems in Math or Other Related Content

They help develop analytical thinking, thinking methods and ability to develop mathematical modeling for problem solving.

2. Mathematical Logic

Mathematics that their solution is almost verbal, that is, very little writing is required and the pupil is required to respond quickly, intelligently and correctly.

3. Memory enhancement exercises

4. Maths & Science Communication

Homework will be given with problems that the student will be required to present solutions orally to the trainer. This helps to develop an in-depth understanding of word problems while developing communication skills in Mathematics and Sciences.

Duration of the Programme

The program consists of 14 one-hour zoom meetings with training assignments in between. All meetings are individual. Group of two student meetings may be possible if students have equivalent ability.
