εισδοχή στο ιδιωτικό σχολείο «The Island School»
στη Λεμεσό, Κύπρος.**

**Fully funded Scholarships for talented STEM students at The Island
School, Cyprus**

The Island Private School of Limassol is offering **50 fully-funded scholarships** for talented students aged **14–16** as part of the **Tech Leaders of the Future** program starting September 2025.

Admission is open to Grades 9–11 (IB program), equivalent to the final 2-4 years of secondary school.

This program is designed for academically strong students with a proven interest and achievements in **mathematics, physics, computer science**, and related STEM subjects.

The scholarship includes:

- Full tuition at a top-tier international IB school (IB MYP + IB DP) until graduation
- Boarding and living on campus near Limassol (if needed)
- Top-tier team of teachers from around the world, experienced in preparing students for academic Olympiads
- Advanced studies in mathematics, physics, computer science, design and entrepreneurship
- Career mentorship and access to leading professionals in the tech industry
- Development of key future skills (4Cs): creativity, critical thinking, collaboration, and communication
- Preparation for top-50 global universities, including scholarship support at the university level.

The program is suitable for students with:

- Strong interest and achievements in mathematics, computer science or physics
- Solid understanding of advanced school-level mathematics; participation and awards in Olympiads or competitions is an advantage
- English language skills

This program is designed for students who aspire to become tech entrepreneurs or build a career in global technology companies. “The people who are crazy enough to think they can change the world are the ones who do.” – Steve Jobs
